December 18, 2013

The Honorable Barbara Mikulski  
Chairman  
Committee on Appropriations  
United States Senate  
Washington, DC 20510

The Honorable Hal Rogers  
Chairman  
Committee on Appropriations  
United States House of Representatives  
Washington, DC 20515

The Honorable Richard Shelby  
Ranking Member  
Committee on Appropriations  
United States Senate  
Washington, DC 20510

The Honorable Nita Lowey  
Ranking Member  
Committee on Appropriations  
United States House of Representatives  
Washington, DC 20515

Dear Chairs Mikulski and Rogers and Ranking Members Shelby and Lowey:

As members of One Voice Against Cancer (OVAC), a coalition of public interest groups representing millions of cancer researchers, patients, survivors, and their families throughout the nation, we ask that you make programs essential to the fight against cancer a top priority as you complete your work on FY 2014 appropriations. Specifically, we ask that you provide the National Institutes of Health (NIH) with a budget of at least $31 billion and restore the cancer research and prevention funding that was lost last year.

We strongly urge you to provide an allocation for the Labor-HHS appropriations bill that will support the full restoration of funding for cancer research and prevention at the NIH and the Centers for Disease Control and Prevention. Significant progress in the fight against cancer is within reach if this effort is adequately resourced.

Cancer continues to be a leading cause of death, reaching indiscriminately into every state and community. One in two men and one in three women will be diagnosed with cancer in their lifetimes; it is also the number one disease killer of children in this country. Cancer will kill more than 580,000 people in the United States this year and will cost more than $201 billion in medical care and lost productivity.

Federal cancer research funding saves lives and promotes economic growth at a time when our country is desperate to do both. For all of these reasons, we ask you to ensure that the fight against cancer remains a top national priority. We ask that the funding lost in the past few years for cancer research, prevention, nursing, and other important programs that play a direct role in reducing cancer incidence and mortality be restored. The members of OVAC
thank you for your consideration of this request and stand ready to support your efforts to promote research funding.

Sincerely,
